

Guidelines for CS3202 mid evaluation

Location: Adv. Com. Lab

Evaluation time: around 10- 15 minutes (for each student).

Overall mark is out of 20

You will be evaluated for following things:

- Give a brief introduction to their system
- Show the schedule (Gantt chart) and indicate whether you are up to the schedule or not
- Show the requirement specification (SRS) and design document
- Explain the database if available
- Explain the written code and illustrate the compliance with the requirement specification and design
- Explain the coding standards and quality
- Explain unit testing (optional)
- Explain additional tasks they have done
- Discuss about the problems they faced; how did they solve those?
- Execute/ run the partially developed system

According to the mid evaluation criteria your project schedule, SRS and design document will be evaluated by the assigned examiner. Therefore improve and update your documents comprehensively, if needed.
